

Seminari/Incontri per il Percorso di Eccellenza per la Laurea Magistrale in Fisica a.a. 2024/2025

Giovedì 17 Aprile – ore 13:00-14:30
Aula Grassano

Writing a Successful Observation Proposal

Luigi Mancini

Abstract: Writing a successful observational proposal is a critical skill for researchers seeking to secure telescope time, funding, or access to observing facilities. This seminar will provide comprehensive guidance for crafting compelling, competitive proposals that are tailored to the expectations of review committees and funding agencies. Key topics include understanding proposal requirements, clearly defining scientific objectives, presenting a robust methodology, and effectively communicating the significance and feasibility of the proposed work.
