

Rossana Marra. Curriculum vitae

Born in Napoli (Italy); date: November 8, 1952.

Laurea in Physics at the Università di Napoli; date: June 13, 1975.

• Present position

Professor of Mathematical Physics

Dipartimento di Fisica Università di Roma Tor Vergata

• Previous positions

- 1977–1978: Fellowship Ministero della Pubblica Istruzione
- 1978–1983: Researcher in Theoretical Physics in the Istituto di Fisica, Università di Salerno
- 1983–1985: Researcher in the Dipartimento di Matematica, Università of Roma "La Sapienza"
- 1985–2001: Associate Professor of Statistical Mechanics Dipartimento di Fisica, Università di Roma Tor Vergata

• Organizing activity

- Member of Senato Accademico since 2015
- Head of the Physics Department 2012-2018
- Vice-Director of the Physics Department 2009-2012
- Vice-President of Consiglio di Corso di Studio in Fisica, years 2006-2009
- Member of the Scientific board of Centro di Matematica e Fisica Teorica "Tullio Levi-Civita".
- member of M& MOCS, Centro Internazionale di Ricerca per la Matematica & Meccanica dei Sistemi Complessi
- Former member of the editorial board of Journal of Statistical Physics.
- Member of the European Community network "Asymptotic Methods in Kinetic Theory".
- Member of the European Community network 2002 "HYperbolic and Kinetic Equations : Asymptotics, Numerics, Analysis"
- Local coordinator of the research project cof 98–99, 2000-02, 2002-04 di G. Parisi "Problemi Complessi in Meccanica Statistica e Teoria dei Campi: uno Studio Teorico, Analitico e Computazionale",
- Member of the organizing committee for the following international Congresses:
Vulcano, Sept. 1998 "Macroscopic stochastic fluctuations: Equilibrium and non Equilibrium",
Siena, May 2000, "New Trends in Statistical Mechanics"
Rome, Accademia dei Lincei, May 2003 "Large systems: Some Mathematical Problems and Perspectives"

Rome, Sept. 2003 "Statistical Mechanics and Applications"

Montecatini, Sept. 2004 "Advances in Mathematical Physics"

2006 Rome, "Statistical Mechanics and Applications"

- Member of the scientific committee for the following international Conferences:
- 2009 Roma "Seminal Interactions between Mathematics and Physics"
- 2010 Parigi "Boltzmann equation:mathematics, modeling and simulations"
- 2014 CIRM, Marseille, "Kinetic Equations"
- Rome, October, 2006 "Workshop on Microscopic Approaches to Elastic and Surface Tension Functionals"

• Visiting professor at (recent years)

Rutgers University: 1995, 1997, 1998, 2001, 2004,2007

New York University, Courant Institute: 1994,1995

IHES, Paris: 1994, 1997, 2000, 2005, 2010

Université de Rouen, (France):1998, 1999

IHP, Paris: 2001, 2008

Brown University, USA:2004

Hong Kong University:2005

Schrodinger Institute, Wien:2006

Kyoto University, Japan: 2006

Marseille University: 2007, 2008

I.Newton Institute,Cambridge: 2010

Singapore University: 2010

Lisbon University:2011

Icerm, Providence:2011

Kyoto University, Japan:2012

Brown University, USA:2015

IHP, Paris: 2017

Brown University, USA:2018

• Research activity

* 1977-1982: Gauge Field Theories and Equilibrium Statistical Mechanics (spin systems)

* 1982-1986: Stochastic Mechanics and Quantum Mechanics.

* 1987-1990: Fluidodynamics and Stochastic Processes.

* 1990–2000 Hydrodynamic limits for interacting particle systems. Behaviour of the solutions of the Boltzmann equations for small Knudsen number without and with boundary effects.

Navier- Stokes equation for stochastic cellular automata , also in the case of thermal automata, and fluctuation-dissipation theorem. In collaboration with researchers of the Rutgers University (USA), New York University (USA), University of Rome 1 and Rome 2. (USA) and University of Rome 1 and Rome 2.

* 2000–2006 Segregation phenomena and interface motion. Kinetic and hydrodynamic equations

for binary fluids, which are suitable to describe the dynamics of the phase separation. In collaboration with researchers of the Universities: Atlanta , Rutgers, L'Aquila and Livermore Laboratory.

* 2006-2010 Kinetic models of phase transition and stability properties

* 2010-2013 Variational problems for non convex functionals and stability problems for mesoscopic models of phase transition. In collaboration with researchers of the Universities: Rutgers, Brown, Goteborg, L'Aquila and Marseille.

* 2014-2017 Boltzmann equation in a bounded domain. Existence and regularity.

* Present research: Hydrodynamic limit for the Boltzmann equation in a bounded domain and for the exterior problem (flux past an obstacle)

Author of 74 papers on international Journals
